### General Information

- A complete commercial crumble (diet) providing all requirements for young growing stock
- The diet should be fed ad-lib to all birds
- A cocciostat has been added to assist in the control of coccidiosis
- Fresh, clean water to be accessible at all times
- To assist young stock in the first few days of life, change feed regularly
- Feed intakes will vary at times, due to climate, bird health / stress and general housing and access to feeders
- Meat Bird is designed for the domestic grower, individual specie commercial diets available in bulk

- *Growth rates will vary according to a range of external factors including housing, variable weather conditions, predators, inoculations and hygiene to name a few*
  - *Phase supplementary feeding both in and out gradually to help avoid set backs.*
  - *Young stock are very sceptical to cold and draughts, housing should be well vented but draught free*
  - *Ensure clean, cool water is accessible at all times*
  - *Feeders and waterers needs to be easily accessible and cleaned of litter on a regular basis*
  - *Quarantine sick birds to prevent possible outbreaks*
- Revision: 20080814*
